

This system is sliding and adaptable. It has been designed and built to offer our customers reliable and versatile support that can meet all your needs.

- ▶ Galvanized steel support with positions for up to 2 systems.
- ▶ Easy to install either at the left or right end of the truck, without obstructing access to the rear door, or at the central position.
- ▶ Compact and lightweight, ideal for transport avoiding the need for multiple trailers.
- ▶ Feed directly from the truck with **7-pin round connector (INCLUDED)**
- ▶ Also available : single mounting point hitch for one application (PF2736)

ONE HITCH, MULTIPLE POSSIBILITIES !

The HITCH system is compatible with several Signal applications that use square steel posts or Baliplast® plastic posts. It is designed to accommodate our construction lights, radars, arrows, traffic signs, lighting systems...
